Update patch log (2018/7/5) : Hello everyone: The patch will be updated in a few hours. Because of player desire, we will update as soon as possible. Patch log: 1. Added 'Historical date'. To prepare for the new game mission system. 2. Added 'AutoSave'. Ensure game progress safety. 3. Added two options: 'Resolution' and 'WindowMode'. It will fix bug: mouse click incorrect position. We have filtered suitable resolutions, according to ur device. ps: DO NOT try to modify the ini files in game folder. using a game resolution higher than desktop resolution, MAY casue 'mouse click incorrect position' BUG. pps: New patch will cause the old game save invalid.. Developing milestone of National Machine : Hello everyone, I will post developing milestone of National Machine. Let players to know developing schedule. However, English is not my mother language. This schedule may not easy to read, but I will illustrate it. I will update news regularly by develop status. Here we go, what new content will be coming? National Machine will post 3 new important contents in 3 months: 1.Design Blueprint, production data

and Technology tree. (March) a)Design blueprint and production data. This content will allow player to design custom products. For example: It means fighters will not be only Spitfire, it will be Gloster Gladiato Mk I, Spitfire MK I, Spitfire MK 22 and so on. Use different processes to Smelt steel, will product different features of steel. These processes may include forged, rolled, carburized, quenching and so on. Corrosion resistance and thermostability steel is a good material for cylinder of motor, but high hardness steel suitable for use in armor. b)Technology tree. Technology tree will unlock processes and concepts. For example: process of turn coal into gas and oil or design concept of tank slope armor. Every country will get different technology tree, but now there will be only British. The other countries tech tree will be coming in later of this year. 2.Fight: enemy bombing. (April) Because of you provide weapon to your country, the enemy wants to destroy your factory, you need to protect your factory and resource using aa. Because of players could only choose British, the enemy main force bombers will be Do. Series. 3.Workers and scientists. (May) Machine cannot make machines in 1930s. Workers also are warriors and a part of national war machine. At the WWII war advanced further, men go to front line, more and more women go to factories. How to train their skill and protect their life? You have to consider. Skilled workers and scientists will could test weapons, promote the progress of science and technology and super weapons (they are nuclear, computer and something can decided winner)..
